Gold Medal Bulbs and Plants for Fall Planting

IT IS with a great deal of pride that we present our annual catalog of bulbs and plants for the fall of Nineteen-thirty. We have proved in a most convincing manner the past year that our bulbs are the very best that can be produced, superior in quality and blooming results.

National Flower Show Awards

At the Eleventh National Flower Show, which was staged in Minneapolis, March 29th to April 6th, we were awarded blue ribbons in EVERY BULB CLASS. This included various exhibits of Tulips, Narcissus, Hyacinths, Lilies, etc., twelve different exhibits of bulbs in flower.

In addition we were also awarded the Holland Bulb Growers GOLD MEDAL for the best bulb garden. This was the highest possible prize offered in competition. Our exhibits were so outstanding and the quality of each flower in these exhibits so superb that all who attended the show were most profuse in their praise of these wonderful flowers.

Among those in attendance at the show were many of the leading bulb growers of Holland who expressed their surprise and voluntarily stated that no finer flowers have ever been shown in Holland or at any other show.

This expression coming from these expert bulb men is the reason for our feeling so elated at our success, because it confirms the confidence we have in our knowledge of bulbs.

Quality Always Counts—Our policy has always been to supply our customers with the very best materials obtainable in every branch of our business. Our success, we believe, is largely due to our strict adherence to this policy. This is more essential with bulbs than with most any other article as it is most important that bulbs be properly grown and cured in order to produce their best. Bulbs of the same kind may look nearly alike to the average person, but may be very different to one with expert knowledge.

In recent years with the increased interest in growing bulbs, bulbs are being offered by some of the so called chain stores as well as others. Some of this is the poorest kind of trash and dear at any price. Planting this kind is bound to cause discouragement. Keep in mind that in buying and planting bulbs it is results that count.

We are advised that we may expect the finest quality in bulbs this year, particularly Tulips which our Holland growers state have had a perfect growing and harvest season.

Service—A complete horticultural service is available to all our friends and customers at all times. This is made possible by our large organization of trained experts in various departments of our business, who will cheerfully advise you on any problem. The staff in our flower shop, greenhouse, nursery or landscape construction departments is always at your service.

THE HOLLAND BULB GROWERS GOLD MEDAL AWARDED TO HOLM & OLSON FOR BULB GARDEN AND SUPERIOR BULBOUS FLOWERS AT THE ELEVENTH NATIONAL FLOWER SHOW, MINNEAPOLIS, 1930

WE WERE AWARDED NINETY-ONE FIRST PREMIUMS, THREE GOLD AND ONE SILVER MEDAL AT THIS SHOW

Bulb Bowls

These bowls are especially adapted for growing such bulbs as Chinese Lilies, Paper-White Narcissus and Hyacinths. Most bulb bowls offered are too shallow. These are deep enough for the largest bulbs and insure against the plant falling over when grown up. They are suited for planting bulbs in water with pebbles or the bulb fibre.

MASTIQUE BOWL—The design and soft color effect of pale yellow and blue on grey body is very pleasing, and suggestive of old Egyptian pottery.

5-inch opening, 70c each; 80c each, postpaid
6-inch opening, 90c each; \$1.00 each, postpaid
7-inch opening, \$1.20 each; 1.35 each, postpaid
8-inch opening, 1.50 each; 1.65 each, postpaid

MOTHER OF PEARL CHIPS—For use in bowls or aquariums. These chips are about the size of small seashore pebbles, which they resemble. They have a bright iridescent lustre, which makes them very attractive, particularly for bulb bowls.

1-pound package, 20c each; 25c each, postpaid
5 pounds, 75c. Parcel Post Extra

"RAINBOW" PEARL CHIPS—These are pearl chips that have been stained in many colors. They are very pretty particularly in glass bowls when their iridescence is displayed at its best.

1-pound package, 25c each; 30c each, postpaid
5 pounds, \$1.00. Parcel Post Extra

BULB FIBRE—The growing of bulbs indoors is a source of great pleasure during the Winter months. Bulb Fibre will be found a great aid and a simple way to grow bulbs. It is scientifically prepared, containing several ingredients in the proper proportions best suited to bulb culture. It is clean and odorless and yet contains plant food such as bulbs need. Should be kept moist and treated like soil. Quart 20c; half peck 70c; peck \$1.25. Mail or express extra.

OUR BULBS ARE OF THE BEST THAT HOLLAND AND AMERICA PRODUCES

Breeder Tulips

THIS class comprises mainly the old original or mother tulips that were favorites in Holland centuries ago, and from which many of the newer types and species have been bred and developed. They are very robust in habit of growth. Their size and great lasting qualities makes them unusually well suited for the garden.

The predominating colors are rich bronze, buff, brownish and purple tones, which is overlaid with a silvery sheen or bloom such as is seen on fruits.

Many of them are sweet scented. The time required for the development of the great flowers makes their blooming season later than most other kinds. They require the same cultural direction as the Darwins.

DARWIN TULIPS WILL BLOOM FOR MANY YEARS FROM ONE PLANTING

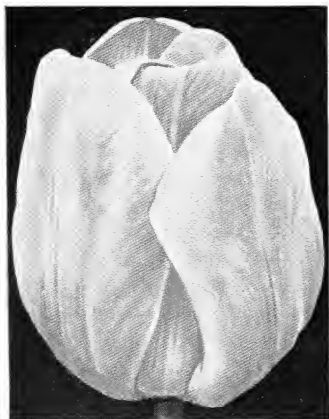

Darwin Tulips

Afterglow

Jubilee

La Fiancee

THE Darwins are a development through hybridization of the old Bi-bloom types, and were first originated in France, but have been greatly improved and developed in Holland in the past twenty to thirty years. Darwins are as a whole the best known of the late flowering group, and are considered the "Aristocrats" of Tulipdom. Darwins do not vary in type and shape as much as the other species, but make up for this in their greater brilliance and intense colors, which range from the deepest violet, maroon and crimson to the most delicate shades of pearl and pure white.

Plant the bulbs as closely as desired, about five inches deep, before the sharp frosts harden the ground. Before snow comes to stay, cover well with leaves or straw. Remove this covering in the spring as soon as it is free from snow and ice.

The list of kinds we offer is most complete, all the newer meritorious varieties as well as all the best of the older kinds will be found in this list. All the bulbs we offer are "Top Size," the kind that produce results. We do not and will not handle the culls and inferior grades that are offered at sale prices.

PLANT PLENTY OF BULBS FOR EARLY SPRING FLOWERS IN THE GARDEN

Cottage and Hybrid Cottage Tulips

COTTAGE tulips as a class comprise a greater variation in form, and a larger variety of colors and shades than any other type of tulips. They are hardy and robust with long, slender, stiff stems, some of them gracefully drooping. The flowers are generally long and oval, others with sharply pointed petals and many open up with gracefully reflexed petals. The Cottage Tulips surpass all others in richness of colors, every imaginable shade can be found among them. Cottage are without question the best cut flower tulips because of their beautiful colorings and their great lasting qualities.

Bizard and Bi-Bloom Tulips

RARE AND UNUSUAL TULIPS

REMBRANDT TULIPS—These are like Darwins in size and form. They are the so-called broken colors that appear as sports from the Darwins. Flowers that revert back partly to the parent flowers, striped and blotched in a great variety of colorations. They were christened Rembrandts for the reason that they resemble the tulip flowers seen in old Dutch paintings.

A VARIETY OF TULIPS ADDS ATTRACTIVENESS TO THE GARDEN

Early Flowering Tulips

THESE are the earliest tulips to bloom in the garden, and the easiest to bring into bloom indoors. Some may be flowered by the end of December if given proper attention. This class contains every hue and color, from the purest snow white to the deepest crimson.

Outdoor Planting—Any good garden soil prepared by spading to a depth of 8 to 10 inches is suitable. Plant the bulbs five inches apart for mass effect, and about four inches deep. The bulbs should all be planted at an equal depth where it is desired to have them bloom equally. Firm the soil well about the bulbs, and cover the beds with leaves or straw before severe cold weather sets in. As soon as snow and ice will allow, remove the covering.

House Culture—Plant six or more bulbs in a pot, set away in a cool, dark place (a good cool cellar is ideal) for a period of six to ten weeks to allow roots to develop, when quite a number of roots show through upon tipping out of pot. They may then be brought into the warm room and light, to bloom.

The approximate height in inches is indicated by a figure following the variety name.

Double Flowered Tulips

These fine large peony-like flowers deserve a greater popularity than is being accorded them. They come into bloom long before the late blooming kinds and make a brilliant display in the garden or border. They may be grown indoors very satisfactorily with cultural care the same as for the early single kinds.

MAKE A PLANTING OF EARLY TULIPS IN THE FOREGROUND OF YOUR SHRUB BEDS

Dutch Hyacinths

GROWING Hyacinths indoors is a very simple matter indeed, and the pleasure derived in watching the development of the bright, cheery, sweetly perfumed flowers during the winter days is ample reward for the slight effort.

INDOOR CULTURE IN POTS—Use ordinary good soil with a little sand to make it more porous. Place a piece of broken crock over the hole in bottom of pot so as to insure free drainage. Fill in with enough of the soil so that the top of the bulb or bulbs is a little below the level of the top. Cover the top of bulbs with soil and firm so as to have at least a half inch below rim. Use 4- or 5-inch pots for the larger bulbs when planting them singly. A number of the smaller bulbs planted in larger shallow pots is very satisfactory. After being potted they should be watered thoroughly and then placed in a cool, dark place (preferably a vegetable cellar) for a period of six to ten weeks. This will induce root growth.

To ascertain the right time to bring them out of the dark, tip the pot upside down, tapping lightly so as to lift pot off soil. If several of the white roots show, it is then safe to bring them into the light.

Hyacinths may also be grown in glasses of water. The bulb should be placed so that the bottom just touches the water and enough water added occasionally to keep it at the proper level. Hyacinths grown in water should also be kept dark until roots 3 to 4 inches are developed. Better results are obtained by growing them as cool as possible.

OUTDOOR CULTURE—Plant the bulbs uniformly about 6 inches deep. Doing so carefully will insure them blooming evenly. When planting a larger bed, the best plan is to remove about 4 inches of soil, firm bulbs in place about 6 inches apart each way, and cover them firmly.

Freesias

These dainty, spicy, sweet-scented blossoms can easily be had in bloom at Christmas if planted early. They are only suited for pot culture as they are not hardy. Plant a number of bulbs to the pot and keep in a cool place such as a vegetable cellar until the roots show through the soil when tipped out of pot. After bringing into light they should be kept in as low a temperature as possible to get best results.

IT IS NOT DIFFICULT TO GROW BULBS INDOORS

Daffodils-Jonquils-Narcissi

EITHER of these names applied to any individual kind in this group is perfectly correct, though it has become a somewhat established custom to term the large trumpet types as "Daffodils," and all the short cupped and cluster flowered types as Narcissus. In many sections the latter are more popularly known as Jonquils, but actually "Jonquils" form a rather small group, producing small flowers in clusters.

The embargo forbidding the importation of Daffodils a few years ago has resulted very favorably for America in that finer and better bulbs produced in this country are now available. Before the exclusion act became effective a few of the leading Holland Narcissus growers brought in their stocks of the choicest varieties, which, while in some instances are not available in large quantities, have added some exquisite new kinds that were not procurable before.

The bulbs which are being produced in America by these expert growers have proven superior to those formerly imported.

Daffodils are among the first flowers that greet us in the spring. Nothing is lovelier or more welcome than the first glimpse of a cluster of these, with their cheerful brightness displayed before the winter snows are quite forgotten, and before many other flowers have started to show signs of activity.

Narcissi prefer a partially shaded location, but will thrive and increase in most any situation. They will continue to increase and bloom from year to year.

They may be grown indoors quite successfully, treating them the same as early tulips, planting them in pots, but should be given more time for root development before being brought into the light. The proper time for this is when a considerable network of the white roots show through when tipped out of pot.

Eagle

OUR Narcissi come from the largest and most noted grower in this country. In the following list we offer a complete list of the choicest and most desirable kinds. The bulbs are all of the largest size and in perfect condition.

Different Types of Narcissi

Barri—The cup or crown measures less than one-third the length of the perianth segments or petals.

Camparnils—Smaller flowers in clusters of three to six.

Incomparabilis—Cup or crown measuring one-third to nearly equal the length of the perianth segments.

Leeds—Comprises all the low or short cupped crowns with white or silvery perianth, the crown white or slightly colored.

Poetaz—Flowers resulting from crosses between the Poeticus and Polyanthus Narcissus. Flowers in clusters, perianth petals fleshy.

Poeticus—Snowy white perianth with bright, short flattened crown or eye.

Trumpet—Trumpet or crown as long or longer than the perianth.

Evangeline

Argent (Semi-double)—Large, creamy white flower, with high yellow center. 20c each, \$2.00 per doz., \$15.00 per 100.

Barri Conspicuus (Barri)—Soft yellow perianth, short cup edged, bright orange-scarlet. 15c each, \$1.50 per doz., \$12.00 per 100.

Bath Flame (Barri)—Bright primrose perianth, broad yellow cup edged, deep orange-red, superb large flower. 50c each, \$5.50 per doz.

Beppy (Trumpet)—A beautiful Bi-color. Large, broad, deep yellow trumpet, finely frilled with pure white perianth. 45c each, \$4.50 per doz., \$35.00 per 100.

NARCISSI INCREASE AND MULTIPLY IN THE GARDEN

Daffodils—Jonquils—Narcissi—Continued**Firebrand**

Bernardino (Incomparabilis)—Wonderful large flower, large creamy white perianth, very large frilled and fluted primrose cup with orange and apricot tinted edges. 30c each, \$3.00 per doz., \$22.50 per 100.

Camparnil Giganteus (Camparnil)—Deep golden yellow clusters of four to six large flowers. The true sweet scented Jonquil. 15c each, \$1.60 per doz., \$12.00 per 100.

Camparnil Rugulosus Flo. Pleno (Camparnil)—Rich, deep golden yellow flowers in clusters of four to six. The double sweet scented Jonquil. 15c each, \$1.60 per doz., \$12.00 per 100.

Camparnil Orange Queen (Camparnil)—Identical with Camp. Giganteus except in color, which is intense deep golden yellow. 15c each, \$1.60 per doz., \$12.00 per 100.

Cleopatra (Trumpet)—Very broad imbricated yellow perianth, long deep golden yellow trumpet. Larger but similar to Emperor. 50c each, \$5.00 per doz., \$40.00 per 100.

Dante (Poeticus)—Pure white perianth, cup margined bright red, earliest of all Poeticus Narcissi. 15c each, \$1.50 per doz., \$11.00 per 100.

Eagle (Poeticus)—Very large, broad petaled, snow white perianth, with intensely brilliant orange-scarlet cup. Early flowering and without question the finest of the Poeticus group. 40c each, \$4.00 per doz., \$30.00 per 100.

(See Illustration Page 9)

Emperor (Trumpet)—Deep primrose yellow perianth, large, rich yellow trumpet. Very large flower and one of the very best of the large trumpets. 20c each, \$2.00 per doz., \$15.00 per 100.

Evangeline (Leedsii)—Very large white perianth, with prettily frilled lemon-yellow cup. Tall, graceful and very refined flower. 15c each, \$1.50 per doz., \$11.00 per 100.

(See Illustration Page 9)

Firebrand (Barri)—Perianth creamy white shading to yellow at base, cup intense fiery red. A most brilliant flower. 20c each, \$2.00 per doz., \$15.00 per 100.

(See Illustration)

Glory of Sassenheim (Trumpet)—A glorious bi-color, broad, creamy white perianth, large, deep canary-yellow trumpet. 20c each, \$2.00 per doz., \$15.00 per 100.

Golden Beauty (Trumpet)—Soft primrose-yellow perianth, brilliant orange-yellow trumpet, large flower, late blooming. The color in this flower is the deepest of all Narcissus. 30c each, \$3.00 per doz., \$22.50 per 100.
(See Illustration)

Juliet (Poeticus)—Larger and stronger than Poeticus Ornatus, which it otherwise resembles. 15c each, \$1.50 per doz., \$10.00 per 100.

Jonquil, Single (Camparnil)—Bright golden yellow flowers in clusters. This is the old original Jonquil. 10c each, \$1.10 per doz., \$8.00 per 100.

Jonquil, Double (Camparnil Fl. Pleno)—This is the double flowered type of the preceding variety. 12c each, \$1.25 per doz., \$9.00 per 100.

King Alfred (Trumpet)—Clear, deep, rich golden yellow of uniform color, large flower. Beautiful, large wide trumpet, deeply frilled and recurving. 25c each, \$2.50 per doz., \$20.00 per 100.

(See Illustration Page 11)

Laureate (Poeticus)—Very large pure white perianth, large yellow cup with brilliant scarlet rim. 25c each, \$2.50 per dozen, \$20.00 per 100.

Laurens Koster (Poetaz)—Broad, creamy white perianth petals, with deep orange cup in clusters, delicately fragrant. 10c each, \$1.00 per doz., \$7.50 per 100.

Lucifer (Incomparabilis)—Large, rounded silvery-white perianth. Long fluted yellow cup with bright orange-red rim. 15c each, \$1.60 per doz., \$12.00 per 100.

Martha (Trumpet)—Beautiful, silvery-white perianth, large, rich yellow trumpet. A strong, robust bi-color. 20c each, \$2.00 per doz., \$15.00 per 100.

Masterpiece (Barri)—Broad, imbricated white perianth, with large, widely expanded and fluted cup of intense orange and crimson. A Narcissus of great substance. 30c each, \$3.00 per doz., \$22.50 per 100.

Minister Talma (Trumpet)—Perianth and trumpet, deep uniform golden yellow. Very large, wide open trumpet, very distinct. 25c each, \$2.50 per doz., \$20.00 per 100.

Olympia (Trumpet)—A giant trumpet daffodil. Very robust, perianth and trumpet golden yellow. 40c each, \$4.00 per doz., \$30.00 per 100.

Poeticus Ornatus (Poeticus)—Perianth purest snow white, cup yellow with scarlet margin. This is the greatly improved Pheasant's Eye. 10c each, \$1.00 per doz., \$7.50 per 100.

Pres. Roosevelt (Trumpet)—A beautiful daffodil with white perianth and soft yellow trumpet. An exquisite flower. 35c each, \$3.50 per doz., \$25.00 per 100.

Queen of England (Poeticus)—Broad, snow white perianth. Brilliant orange cup with beautifully frilled, scarlet rim. 15c each, \$1.50 per doz., \$11.00 per 100.

Red Chief (Barri)—Broad petaled, glistening white perianth. Wide, deep yellow cup with bright crimson margins beautifully frilled. 25c each, \$2.50 per dozen, \$20.00 per 100.

Sir Watkin (Incomparabilis)—Primrose-yellow perianth, orange-yellow cup. Very large flower, grows very tall. One of the very best and most popular Narcissus. 15c each, \$1.60 per doz., \$12.00 per 100.

Spring Glory (Trumpet)—A magnificent and beautiful bicolor. Very large, pure white, imbricated perianth, great open golden-yellow trumpet, reflexing at the brim. Delightfully fragrant. 20c each, \$2.00 per doz., \$16.00 per 100.
(See Illustration)

Sulphur Beauty (Trumpet)—Very large, imbricated white perianth. Broad and large pale sulphur trumpet, with finely fluted, reflexed rim. 25c each, \$2.50 per doz., \$20.00 per 100.

Thalia—This is a very distinct and unique departure among Narcissi. Three or four pure white flowers which resemble Orchids on one stem. Known as the Orchid Narcissi. Largest bulbs \$1.50 each, \$16.00 per doz.

Tresserve (Trumpet)—Mammoth canary-yellow, imbricated perianth. Trumpet soft golden yellow, very large, broad and open with recurved brim. A very robust, free flowering Narcissus of enormous size. 30c each, \$3.00 per doz., \$22.50 per 100.

Triumph (Poetaz)—Three to five large flowers in cluster, very broad pure white perianth and large deep yellow cup. 15c each, \$1.50 per doz., \$12.00 per 100.

Van Waveren's Giant (Trumpet)—A giant among Daffodils. Perianth pale primrose. Strongly imbricated, massive, golden yellow trumpet with very broad brim. 45c each, \$5.00 per doz.

Von Zion (Double Trumpet)—Pure, deep golden yellow, large expanded double trumpet. The old fashioned double Daffodil. 15c each, \$1.50 per doz., \$11.00 per 100.

Victoria (Trumpet)—Broad, creamy-white perianth with closely overlapping petals. Bright golden yellow trumpet with wide frilled brim. Best for indoor culture. 15c each, \$1.50 per doz., \$11.00 per 100.

White Lady (Leedsii)—Broad, white perianth. Small beautifully crinkled pale canary cup. Very free flowering variety. 10c each, \$1.00 per doz., \$8.00 per 100.

Will Scarlet (Incomparabilis)—Reflexing, creamy-white perianth. Very broad, open, fiery orange-scarlet cup, elegantly frilled. Late blooming, best for outdoor culture. 25c each, \$2.50 per doz., \$18.00 per 100.

Polyanthus Narcissi

These are best suited to indoor culture and are very satisfactorily grown in either pots or in the bulb bowl in water. If planted outdoors they should be heavily covered.

Our bulbs are American grown and we consider them superior in every way to those formerly imported from France.

Gloriosa—Very free and early flowering. Flowers in large clusters and similar to the Chinese Lily. Large bulbs 15c each, \$1.50 per doz.

Grand Soleil d'Or—Large clusters of deep golden yellow flowers, strongly fragrant. Large bulbs 35c each, \$3.00 per doz.

Paper-White (The French Narcissus)—Pure white. Very desirable for growing in bowls of water and pebbles. Large bulbs 10c each, \$1.00 per doz.

NOTE—Add 15c per dozen for all Narcissi if to be sent by parcel post.

Crocus

Crocus

THESE bright, cheerful flowers are earliest of all to bloom. They are often in bloom before the snow is gone. A few dotted about in clusters in the lawn is a most pleasing view from indoors. The colors come in bright golden yellows, deep blue to light blue, striped and pure white. Plant them anywhere. Do not plant too deep, one inch, not to exceed two inches is best. They may also be grown in pots indoors. Treat same as Tulips or Hyacinths.

COLCHICUM—AUTUMN FLOWERING CROCUS
The flowers of these curious plants do not appear until their foliage has died down. The bulbs should be planted in the rockery or in places where their growth during the early summer months will not be disturbed. The growth stops during July or early August and the fine large flowers come early in September and continue with a succession long after other flowers have been cut down by frost and severe weather. We offer very large bulbs of the two choicest kinds.

Lilies

Lilies that are desired for house culture should be potted firmly in good rich soil, with plenty of free drainage, and placed in a cellar or cool, dark place until the roots show through the soil when tipped out of pot. They may then be placed in the light, not too warm at first, when they will start and continue to grow and bloom.

EARLY FLOWERS MAKE SPRING MORE JOYOUS

Exquisite Peonies

The Peony has the largest and most gorgeous flowers of all perennials. It grows easily and blooms profusely.

PLANTING—The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants. A light covering of straw, after the ground has frozen, is desirable.

QUALITY—The "roots" are substantial plants with 3 to 5 eyes. "Clumps" or older stock that will produce greater flowering results can be supplied at double the catalog price of "roots."

Bright Phlox

For Mid-Summer Flowers

PHLOXES are very hardy floriferous perennials that give bold, brilliant color effects from July to frost. They can be had in pure white, pink, lavender and crimson and in varying combinations of these colors.

Where to Plant—They are exceedingly attractive when planted in masses of a single kind in a bed or border. Their midsummer bloom makes them a most valuable addition to beds where such spring-blooming plants as Iris, Peonies, Poppies, etc., are located.

Planting—Space the plants 15 to 18 inches apart and set the roots about 2 inches below the ground surface, making sure that the new eyes are well covered. After freezing weather cover these new plantings with a light mulch of straw or hay.

Quantity Rate—5 or more of a single variety will be supplied at 5c less per plant, viz., plants priced at 35c each are \$1.50 for 5.

Red Phlox

- B. Comte**—Bright purplish-crimson with satiny sheen. Medium height. One of last to flower. 40c, 2-year 60c.

- Coquelicot**—A bright orange-scarlet of outstanding color. 35c, 2-year 50c.
- Dr. Konigshofer**—Brilliant orange-scarlet, with dark blood-red eye. Medium height, midseason. 35c, 2-year 50c.
- Gen. Van Heutz**—Brilliant salmon-red, with light center changing later to deep red eye. 35c, 2-year 50c.
- Mme. Bezanson**—Rich crimson. medium height. 40c, 2-year 60c.
- R. P. Struthers**—Rosy carmine with claret-red eye. Very bright; tall. 35c, 2-year 50c.

White Phlox

- Frau Anton Buchner**—Undoubtedly the finest white Phlox which has as yet been raised. Large flowers of perfect form. 35c, 2-year 50c.
- F. G. Von Lassburg**—Purest white; individual flowers very large. Tall, mid-season. 35c, 2-year 50c.
- Miss Lingard**—The most popular white. Immense heads of white flowers in late June and again in September. 35c, 2-year 50c.
- Mrs. Jenkins**—Immense trusses of pure white flowers. Early. 35c, 2-year 50c.
- Mia Ruys**—The finest of the dwarf white Phlox. Snow-white flowers of large size. Height 8 to 9 inches. 35c, 2-year 50c.

Lavender and Purple Phlox

- Eugene Danzanviller**—Soft lavender shading lighter to center. 35c, 2-year 50c.
- Champs Elysees**—Large trusses of dark crimson-purple, medium height. 35c, 2-year 50c.
- Mrs. Chas. Dorr**—A beautiful shade of lavender. Very large conical heads. 35c, 2-year 50c.

Dwarf Phlox for Borders

- Phlox Subulata**—An early spring-flowering type which during the flowering season is a mass of bloom. An excellent plant for the rocky and border, and invaluable for carpeting the ground or covering graves.
- Rosea**—Pink. 25c, 2-year 40c.
- Alba**—White. 25c, 2-year 40c.

Pink Phlox

- Elizabeth Campbell**—Very large heads, with flowers of quite a new color—light salmon changing to pink in the center. 50c, 2-year 75c.
- Mme. Paul Dutrie**—Opens a soft lilac-rose which gets lighter as it ages. 35c, 2-year 50c.
- Pantheon**—Deep Salmon-rose; light center. Very large flower. Tall. 35c, 2-year 50c.
- Rheinlander**—A most beautiful salmon-pink with deeper center. Immense size. 35c, 2-year 50c.
- Rijnstroom**—A lovely rose pink, much like Paul Neyron rose. Very large flower heads. 35c, 2-year 50c.
- Thor**—A rich salmon pink with crimson eye. 35c, 2-year 50c.
- W. C. Egan**—Soft shade of lilac with dark pink eye. General effect is a soft rose color. 35c, 2-year 50c.

A Buckthorn Hedge Makes a Pleasing and Practical Boundary

AN ATTRACTIVE HOME YARD IS A WISE INVESTMENT

YOUR OUTDOOR LIVING ROOM

YOUR back yard is the most valuable part of your home grounds. Through a moderate amount of planting you can create there a useful and beautiful spot that will be an inviting out-door living-room during the hot summer days. The modern back yard becomes as it should, the family playground.

Privacy and Seclusion

In the outdoor living room there are to be "walls" to give seclusion from the public. These "walls" are not heavy masonry but are boundary plantings of flowering shrubs or evergreens or if space is limited the yard may be enclosed by a trimmed hedge. Within this green border there can be bankings of colorful flowers both annuals, hardy perennials and bulbs while an open lawn makes the center of the picture. There are trees to give protection and cooling shade and seats and arbors to invite relaxation. Even the smallest back yard can be transformed into a spot of great out-door beauty and usefulness.

Children are safe from the dangers of the street

Plant This Fall for Next Summer's Pleasure

An invitation to enjoy the out-of-doors with privacy and repose.
Home of Mr. C. F. Aldrich, St. Paul
